#### **CAPEX**

**Capital Structure** 

Medium-term: Projected an additional US\$3bn+ by 2029, beyond the projects already announced, achieving the targeted unlevered IRR.

- Medium-term: Target 2.0-2.5x Net Debt to EBITDA
- Projected average all-in cost of debt finance including HCI < 6.0%
- HCI financing costs are paid out of subsidiary retained earnings, hence no P&L impact

#### **Others**

- ADNOC L&S effective tax rate (ETR) decreased to 6% from 9% during 2025
- Navig8 acquisition accounting results in an incremental depreciation of \$54m in FY 2025 on fair value uplift, reducing in subsequent years refer to appendix
- Dividends: Targeted annual dividend per share growing by 5% annually from the 2024 dividend of US\$273 million plus PCS distributions

Oncompared to FY2024 actuals which exclude Navig8 2026-2029 CAGR Onconsolidation & review of accounting treatment, ADNOC L&S determined accounting for commercial pooling on a net basis not recognizing revenue attributable to 3rd parties contrary to Navig8's previous treatment; partially offset by gross reporting of subchartering. This is IFRS compliant, as a result revenue decreases while EBITDA and Net Income remain unchanged.

#### **Outlook**

- Supportive long-term tanker vessel demand and supply fundamentals underpinned by increased ton-mile demand, limited newbuild vessel deliveries and an increasing number of scrapping candidates (vessels 20+ years)
- Sanctioning of crude tanker fleet has benefited sentiment and reduced vessel supply
- Continue to expect relative softness in Dry Bulk TCE rates in 2025. Potential for new China stimulus packages to support economic growth
- Despite improvement in LNG freight rates, current TCE rates will encourage scrapping of older tonnage, providing further comfort to our positive long-term view on LNG fundamentals
- Suez Canal rerouting continues to support ton-mile demand
