Highlights

- Revenues surging 89% YoY to \$981 million primarily driven by the consolidation of the Navig8 tanker fleet, marking a key milestone in the Company's strategic expansion
- EBITDA increased by 25% YoY to US\$290 million due to Navig8 integration and one-off items associated with LNG Carrier early contract termination benefit and gain on sale of MGC 'Yas' vessel
- Gas Carriers Net Profit up by 138% YoY, due to resumption of one off-hire LNG vessel and the full impact of VLGC vessel "Al Maryah" delivered in Q1 24 and the charter-out of two VLGC vessels to ADNOC Global Trading
- Net Profit lower by 25% YoY to US\$126 million due to a combination of finance cost and additional depreciation following the Navig8 fleet acquisition

NUMBER OF CHARTERED-IN VESSELS

- Sale of MGC – YAS completed in January 2025
- Took delivery of newbuild LNG vessels in Q2 2025 – Al Rahba
- Two additional newbuild LNG vessels scheduled for delivery in 2025
- Two VLEC vessel scheduled for delivery in H2 2025

- Chartered-in fleet primarily focused on Dry - Bulk shipping activities
- Reduced number of chartered-in Dry Bulk vessels due to lower seasonal demand

- Softer TCE rates in H1 2025 due to seasonal demand softness
- Q2 2025 saw improving VLCC TCE rates, driven by deployment of modern, eco-friendly, dual-fuel vessels
- LNG short-term rates are under pressure from fleet growth and startup delays to new export projects

Outlook

- Supportive long-term tanker vessel demand and supply fundamentals underpinned by increased ton-mile demand, limited newbuild vessel deliveries and an increasing number of scrapping candidates (vessels 20+ years)
- Positive 2H 2025 tanker market sentiment given OPEC+ unwinding schedule and seasonally stronger winter demand
- Sanctioning of crude tanker fleet has benefited sentiment and reduced vessel supply
- Expect relative softness in Dry Bulk TCE rates into 2H 2025 as fleet growth continues to be above tonne-mile demand
- Despite improvement in LNG freight rates, current TCE rates will encourage scrapping of older tonnage, providing further comfort to our positive long-term view on LNG fundamentals
- Suez Canal rerouting continues to support ton-mile demand
